1 Entity

Banco de Reservas de la República Dominicana, Banco de Servicios Múltiples and subsidiaries (together referred to as the “Bank”), is owned by the Government of the Dominican Republic and was established on October 24, 1941 under Law No. 581 as amended by Laws No. 6133 of December 17, 1962, and 281 of January 1st, 1976 and its modifications.

The Bank offers multiple banking services to the Dominican Government and its entities (public sector), to private companies and to the general public (private sector). The main activities of the Bank and its subsidiaries include the granting of loans, investment, deposits, financing, insurances, management of pension funds and health services, sale and development of real estate projects, securities underwriting, among others.

The main offices of the General Administration are at Torre Banreservas at Winston Churchill Avenue, Santo Domingo, Dominican Republic.

A detail of the main officers is as follows:

<u>Name</u>	<u>Position</u>
Simón Lizardo	Minister of Finance -Ex in officiate Chairman
Vicente Bengoa Albizu	General Administrator
José Manuel Guzmán Ibarra	Sub-Administrator - General Business
Aracelis Medina Sánchez	Sub-Administrator - General Administration
Damián Santos	Comptroller

The Bank is regulated by the Monetary and Financial Law and its regulations as well as by resolutions of the Monetary Board and the Superintendence of Banks of the Dominican Republic.

As of June 30, 2013 and December 31, 2012, a detail of the Bank's offices and automatic teller machines (ATMs) is as follows:

Location	June 30, 2013		December 31, 2012

2 Summary of significant accounting policies

2.1 Accounting basis for presentation of financial statements

The Bank prepares its interim consolidated financial statements in accordance with the accounting standards established by the Superintendence of Banks of the Dominican Republic, regulations, resolutions, circulars and other specific provisions issued by the Superintendence of Banks and the Monetary Board of the Dominican Republic, within the framework of the Monetary and Financial Law. These practices differ in form and content from the International Financial Reporting Standards applicable for banks and financial institutions. Therefore, the accompanying consolidated financial statements-statutory basis do not pretend to present the consolidated financial position, consolidated financial performance and consolidated cash flows in accordance with International Financial Reporting Standards.

The subsidiaries include: insurance, management of pension funds, administrator of health plans and securities underwriting, which have been prepared in accordance with the accounting standards established by the Superintendence of Insurance, the Superintendence of Pensions, the Superintendence of Health and Labor Risks and the Superintendence of Securities, respectively. The International Financial Reporting Standards (IFRS) are used as supplementary rules. The accounting standards of the Dominican Republic for financial institutions differ in certain aspects from the IFRS. Therefore, these consolidated financial statements do not intend to present the financial position, results of operations and the cash flows in accordance with IFRS.

The interim consolidated financial statements, and the explanatory notes have been prepared in thousands of Dominican Pesos (RD\$).

Differences with International Financial Reporting Standards

The accounting practices established by the Superintendence of Banks of the Dominican Republic differ from IFRS in certain aspects. A summary of the most relevant differences is presented below:

- (i) Allowance for loan losses are determined through an assessment of inherent risks made by the Bank and the reserve levels that result from the classification assigned to each loan (for commercial loans classified as major debtors) or days past due (for consumer, mortgage loans and minor commercial loans) and some specific approvals issued by the Superintendency of Banks. This evaluation (for major commercial debtors) includes a review of credit files, considering borrowers' financial statements, payment history and collateral. In accordance with International Financial Reporting Standards loan portfolios are assessed by separating individual and collective loans. Individual loan analysis is evaluated on a loan-by-loan basis.

Loans that are collectively evaluated to determine if impairment exists are assessed, considering the estimates of the contractual cash flows of such groups, the historical loss experience and opinion from management as to whether the current economical and loans conditions may change the actual level of the inherent historical losses. A provision is

Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

- recognized, if objective evidence exist that there has been an impairment loss, which would result in the difference between its carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate.
- (ii) Banking regulations require financial entities to establish allowances for assets received in loan settlements according to the following criteria: movable goods are reserved over a two-year period, on a straight line basis, starting six months after receipt of the asset, while real estate is reserved over a three-year period, on a straight-line basis, counted as of the first anniversary of its recording in the Bank's books. IFRS require that these assets be reserved only in the event that impairment occurs.
 - (iii) Interest receivable past-due for less than 90 days is reserved according to the classification of the corresponding principal. Interest past due for over 90 days is fully reserved, except in the case of credit cards, where interest receivable is reserved after 60 days past due. Subsequent accrued interest is not recognized in the consolidated financial statements. According to IFRS, allowances for interest receivable are determined based on risks specific to the loan; in the event of impairment of interest receivable, the loan amount is adjusted and subsequent accrual of interest is based on the adjusted balance using the effective interest rate.
 - (iv) Financial entities translate all transactions in foreign currencies at the official exchange rate as established by the Central Bank of the Dominican Republic at the date of the balance sheet. IFRS require that all balances in foreign currencies be translated at the exchange rate to which the Bank had access at the balance sheet date.
 - (v) The Superintendence of Banks of the Dominican Republic requires that reserves recorded on the provision for loans at the moment of executing their collateral, be transferred to the assets received on foreclosure. IFRS only requires reserves when the fair value of the asset is lower than its book value or when impairment exists.
 - (vi) The presentation and certain disclosures of the financial statements according to IFRS differ in certain aspects from those required by the Superintendence of Banks of the Dominican Republic.
 - (vii) According to banking practices, income derived from credit card renewals, letters of credit and customer acceptances are recorded immediately as income. IFRS require recognition of this income to be deferred over the duration of the respective cards, letters of credit and outstanding acceptances.

(In thousands of Dominican Pesos)

- (viii) The Superintendence of Banks of the Dominican Republic requires that computer softwares and leasehold improvements, be previously authorized by the Superintendence in order to be recognized as assets. IFRS requires that these items be recognized as intangible assets as long as they generate future economic benefits.
- (ix) The Superintendence of Banks of the Dominican Republic requires that short-term highly liquid investments which are easily convertible to cash be classified as investments. IFRS only requires that this type of investments with original maturity up to three months be classified as cash equivalents.
- (x) The Superintendence of Banks of the Dominican Republic requires that financial institutions classify investments in four (4) categories, which are: i) trading, (ii) available-for-sale investments, (iii) held-to-maturity investments, and (iv) other investments in debt securities. Additionally, allows classifying in one of the three first classifications only those investments that are listed in an active market. IFRS does not require this kind of distinction, and the classification will depend on management intention. Also IFRS does not provide other investments classification.
- (xi) The Superintendence of Banks of the Dominican Republic allowed multiple service banks the revaluation of its properties as of December 31, 2004. IFRS state that once a classification of assets is revalued such revaluation should be updated when significant and frequent value changes occur for such assets.
- (xii) In accordance with current banking regulations, the Bank is required to classify cash flows resulting from the loans portfolio and customer deposits as investment and financial activities, respectively. IFRS require cash flows from these transactions to be classified as operating activities.
- (xiii) The Superintendence of Banks of the Dominican Republic requires the banks to record an allowance for contingent operations which includes granted guarantees, non-negotiated letters of credit issued, and lines of credit of automated use based on a classification of risk categories following the REA. The International Financial Reporting Standards require allowances be recorded when there is a present obligation as a result of a past event, and it is probable that the entity will have to pay it and a reliable estimate of the obligation can be made.
- (xiv) The Superintendence allowed the recognition as interest income upfront commission collected on discount of invoices to some important customers. IFRS require that such commission be deferred and recognized as income using the effective interest method.

- (xv) In December 31, 2010, the Superintendence of Banks allowed the recognition of liabilities related to the Pension Fund and the pensions paid directly by the Bank over an eight (8) year-period beginning in 2011. IFRS establishes that pension plan obligations must be recognized initially in full through profit and loss and periodically updated in subsequent periods.
- (xvi) Banking regulations require that investment in stocks be valued at the lower of fair value or cost. If there is not a security market, they are valued at cost less impairment. The quality and creditworthiness of the issuer should be taken into consideration, following the Ruling for Assets Evaluation and Instructive for the Assets Evaluation Process as stated in the banking regulations. In accordance with IFRS it must be determined if there is control or significant influence. If control exists, the consolidated financial statements must be prepared. If it is determined that there is significant influence, investments must be recognized under the equity method.
- (xvii) In accordance to the current banking regulations, the Bank must quantitatively disclose the risks derived from its financial instruments, such as liquidity and interest rate risks and the credit risk of the loans, among others. IFRS require the following disclosures that allows the users of the financial statements to evaluate: a) the importance of the financial instruments in relation to the financial position and results of the entity and b) the nature and the scope of the risks resulting from the financial instruments to which the entity is exposed during the year and at the report date and how the entity manages these risks.
- (xviii) The Superintendence of Banks of The Dominican Republic authorized the Bank to classify factoring operations as account receivables. According to International Financial Reporting Standards these operations must be classified as loans.
- (xix) The Superintendence of Banks authorized to incorporate in the consolidation, financial statements of subsidiaries with different accounting practices from the Accounting Manual for Financial Institutions without being homogenized to the accounting practice of the Bank. Under IFRS all subsidiaries in a consolidated group should use the same accounting policies.

Differences between accounting practices for Insurance Companies and International Financial Reporting Standards:

Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

- i) As established by the Superintendence of Insurance, short-term insurance contracts are recorded as revenue when billed; as a result, unearned premium reserves are computed based on specific percentages according to the line of business and are not based on a pro-rata distribution over the term of the policy. These minimum percentages are established in Article 141 of the Insurance and Surety Bonds Law No. 146-02, as follows:
- 15% Transportation and freight
 - 5% Collective and individual life, accident and health, provided premiums are collected on a monthly basis
 - 40% Surety bonds
 - 40% Other insurances

In accordance with International Financial Reporting Standards, income from insurance contracts, both general and short-term life insurance, is recorded proportionately over the term of the policy. The amount of the premium paid when the policy is issued, as well as the portion relating to the unexpired risk, should be recorded as deferred income.

In the case of long-term life insurance contracts with a guaranteed minimum term, the premium income is recognized when payment is received from the insured party.

For long-term insurance contracts without a guaranteed minimum term (e.g. long-term death or survivorship), premiums are recognized as a deferred income, which is increased by the interest or changes in the unit price and decreased for management fees, death benefits and any other deductions.

- ii) The following items are considered as investments up to the limits permitted by Law No. 146-02:
- ◆ Mortgage loans.
 - ◆ Certificates of deposit in domestic banks.
 - ◆ Reserves held by local insurers and reinsurers.
 - ◆ Real estate located in the country
 - ◆ Shares and bonds of domestic corporations.
 - ◆ Liquid financial instruments.
 - ◆ Negotiable securities placed through the Dominican stock exchange.
 - ◆ Investments in foreign currency.

In accordance with Insurance and Surety Bonds Law No. 146-02 governing private insurance operations, an amount equivalent to the sum of the mathematical risk reserves - general and personal insurance and surety bonds, catastrophic, specific and statutory - must be invested in any of the aforementioned categories and any amount in excess of the maximum percentage should be classified as other investments.

Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

In accordance with IFRS investments are classified into four (4) categories: financial assets at fair value with changes through profit and loss, held-to-maturity financial assets, loans and receivables, and available-for-sale financial assets. According to IFRS investments must be recognized initially at fair value and subsequently to its initial recognition are measured at amortized cost, fair value through profit or loss, or fair value with changes in equity depending on its initial classification. Additionally, IFRS does not provide for Other Investments classification.

- iii) The Superintendence of Insurance requires that short-term investments, highly liquid investments and investments easily convertible to cash be presented as investments. International Financial Reporting Standards require that such investments be presented as cash equivalents.
- iv) Revenues and expenses pertaining to prior years are recorded in the year they are identified. International Financial Reporting Standards require that these transactions be recorded retroactively correcting the previously reported financial statements, including presentation of the statement of financial position for the most recent three (3) years.
- v) The preparation of a statement of changes in shareholders' equity disclosing the composition and changes in the accounts that comprise shareholders' equity is not required, nor is the presentation of a statement of comprehensive income disclosing the nature and amount of items corresponding to other comprehensive income. IFRS requires the presentation of a statement of changes in stockholders' equity and a statement of comprehensive income as part of the basic financial statements.
- vi) Premiums receivable that are considered uncollectible by the Company are reversed against revenue. In accordance with IFRS, premiums receivable should be assessed regularly and a provision should be created for amounts deemed uncollectible. This provision is recorded through a charge to operating expenses.
- vii) Investments in equity instruments are recorded initially at cost using the equity method. Additionally, parent companies are allowed to issue financial statements and consolidation is not required. IFRS requires consolidation for parent companies and the issue of separate financial statements is not allowed except for specific situations.
- viii) The effects of reinstatement and liquidation of reinsurance contracts are adjusted with the reinsurer on the final liquidation date of the contract. IFRS requires that changes in insurance contracts be estimated and recorded in profit or loss based on such estimations.
- ix) The recognition of specific reserves for claims incurred but not reported at the statement of financial position date is not required. IFRS requires creating a provision (IBNR) for those probable and quantifiable losses and that this be recorded through a charge to operations of the year in which the incident occurred.

(In thousands of Dominican Pesos)

- x) International Financial Reporting Standards requires an entity to separate embedded derivative from the host contract and account it for as a derivative if economic characteristic and risks of the embedded derivative are not closely related to the economic characteristic and risks of the host contract. Accounting practices established by the Superintendence of Insurance of the Dominican Republic do not provide for guidance on accounting of derivatives.
- xi) There are certain differences in presentation and disclosures between the accounting practices established by the Superintendence of Insurance of the Dominican Republic and financial statements prepared in accordance with International Financial Reporting Standards.
- xii) International Financial Reporting Standards requires to perform a Liability adequacy test, which is basically a calculation based on a statistical methodology that determines if provisions recorded by the Bank are adequate to honor possible commitments arising from insurance contracts. Accounting practices of the Superintendence of Insurance do not require this kind of provisions.
- xiii) The Bank accounts for salvages and recoveries in off-balance sheet accounts. International Financial Reporting Standards establish that at the balance sheet date such assets shall be measured at fair value less any cost of sale and recognized as other assets against a deduction of the cost of the claims that gave rise to the salvages in the period in which the Bank obtained the rights over the salvages and recoveries.
- xiv) According to accounting practices of the Superintendence of Insurance savings account component of life insurance contracts are not accounted separately in the balance sheet. International Financial Reporting Standards require to separate and recognized as a liability a saving account when it is a component of an insurance contract.
- xv) Accounting practices of the Superintendence of Insurance do not require to separate revenue for the rendering of a service that is a component of an insurance contract. International Financial Reporting Standards requires to separate from an insurance contract a component of rendering of service for which the Bank does not keep any insurance risk. Such component should be recognized as a liability, and any unearned commission collected on the intermediation of the service shall be deferred.
- xvi) Accounting practices of the Superintendence of Insurance require the additional costs incurred in the process of acquisition and issuance of insurance contracts is recognized as expenses when they occur. According to IFRS these costs must deferred and recognized as expense using the straight line method over the life of the related insurance contract.

- xvii) Accounting practices of the Superintendence of Insurance, establishes the classification of Property, plant and equipment indistinctively of the use of the assets. IFRS requires that Property, plant and equipment which intended to be used to obtain revenue from rent shall be classified as investment property. The recognition and presentation of investment property differs from the assets that are being used in as Property, plant and equipment.

The Bank has not quantified the effects of differences between the applied accounting basis and IFRS on the interim consolidated financial statements.

2.2 Use of estimates

The preparation of the interim consolidated financial statements requires management to make estimates and assumptions that affect the amounts of assets and liabilities reported and the disclosure of contingent assets and liabilities as of the date of the consolidated financial statements, and the amounts reported as current revenues and expenses. Estimates are used mainly in the determination of provisions for assets subject to risk, bonuses and other employee benefits, depreciation, impairment of assets, income tax and contingencies. Actual results may differ from such estimates.

2.3 Consolidation

The interim consolidated financial statements include the accounts of Banco de Reservas de la República Dominicana, Banco de Servicios Múltiples, and subsidiaries owned either directly or indirectly in more than 50%, which are: Peaje Dominicano, S. A. and Tenedora Banreservas, S. A. and subsidiaries, which include Seguros Banreservas, S. A. Reservas Asistencia, S. A. S., Reservas Inmobiliaria, S. A. and subsidiaries, Administradora de Fondos de Pensiones Reservas, S. A. and Inversiones & Reservas, S. A. Additionally, Administradora de Riesgo de Salud Reservas, Inc., a non-profit entity whose net assets are included as other liabilities.

All these entities are located and incorporated under the laws of the Dominican Republic. The balances and transactions among the consolidated entities are eliminated in consolidation. The accounting policies of the subsidiaries are substantially consistent with the accounting policies adopted by the Bank except for the regulated companies which prepare its financial statements accounting with the accounting practices issued by the Superintendency of Insurance of the Dominican Republic and the Superintendency of Pensions and Health of the Dominican Republic.

The Superintendence of Banks of the Dominican Republic approved the incorporation of the financial statements of these subsidiaries without homogenizing its accounting practices to the ones followed by the Bank.

(In thousands of Dominican Pesos)

The entities included in the interim consolidated financial statements are Banco de Reservas de la República Dominicana, Banco de Servicios Múltiples, Parent Company, and the following subsidiaries:

<u>Subsidiaries</u>	<u>Country of Operation</u>	<u>% of Ownership</u>
Tenedora Banreservas, S. A. and Subsidiaries	Dominican Republic	97.65
Peaje Dominicano	Dominican Republic	100.00
Administradora de Riesgo de Salud Reservas, Inc.	Dominican Republic	<u> - </u>

Intragroup balances and income and expenses arising from intragroup transactions were eliminated in preparing the consolidated financial statements.

The Superintendence of Banks of the Dominican Republic authorized the Bank to not eliminate in the consolidation the allowance for investment in subsidiaries. This allowance is used in the consolidation to comply with other provisions required at consolidated level.

Banco de Reservas de la República Dominicana, Banco de Servicios Múltiples - Regulated by the Superintendence of Banks of the Dominican Republic

The Bank is the most important entity and provides financial intermediation services such as loans, investments, certificate of deposits and financing to the Dominican Government, its autonomous entities and state enterprises (public sector) and to privately owned enterprises and the general public (private sector).

Administradora de Riesgo de Salud Reservas, Inc. - Regulated by the Superintendence of Health and Labor Risks of the Dominican Republic

It is a Non-For Profit organization dedicated to the management of health insurance plans, established by the National Council of Social Security, in accordance to Law No. 87-01 and its complementary regulations.

Peaje Dominicano, S. A.

This Company was incorporated under the laws of the Dominican Republic and manages the operations of the toll stations of the Duarte and 6 de Noviembre highways, as well as the Sanchez road, and other related activities, such as collection, installation of updated technology instruments, maintenance of equipment, supervision of service staff in the stations and coordination of the security personnel. Furthermore, the Company is also managing a business parking building.

Tenedora Banreservas, S. A. and Subsidiaries

It is the parent Company of the following subsidiaries:

(a) *Seguros Banreservas, S. A. and Subsidiaries - Regulated by the Superintendence of Insurance of the Dominican Republic.*

This company is authorized to operate under the Law of Insurance No. 146-02.

(b) *Administradora de Fondos de Pensiones Reservas, S. A. - Regulated by the Superintendence of Pensions of the Dominican Republic.*

The Administradora de Fondos de Pensiones Reservas, S. A. is dedicated to the administration of pension funds of third parties, or plans and pension funds of companies or associations that are entrusted for administration on the basis of specific contracts, according to Law 87-01 that created the Dominican system of Social Security and the complementary regulations to this law.

Currently, AFP Reservas manages Pension Fund T-1 AFP Reservas (Contribution), Pension Fund T-4 AFP Reservas (Distribution) and Pension Funds T-5 AFP Reservas (Social Solidarity), according to Law 87-01.

(c) *Reservas Inmobiliarias, S. A. and Subsidiary.*

Reservas Inmobiliarias, S. A. and Subsidiary, performs real estate transactions, such as buying, selling, leasing, management and development of real state properties.

(d) *Inversiones & Reservas, S. A. - Regulated by the Superintendence of Securities of the Dominican Republic.*

Inversiones & Reservas, S. A., was incorporated under the laws of the Dominican Republic. The Company's main purposes consist of buying and selling securities, exchange of securities, underwriting part or the whole, issuance of securities for subsequent trade to the public, promoting and facilitating the issuance of securities in public offerings and to perform all operations authorized by the Superintendence of Securities of the Dominican Republic.

2.4 Loan Portfolio

Loans are carried out at their outstanding balances less the required allowance for loan losses.

The Bank calculates interest on loans and cardholders based on the outstanding balance of the principal.

Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

The Bank assigns to commercial loans that have been restructured an initial classification no lower than “C” independently of their capability and payment behavior and country risk; this can be changed subsequently to a lower risk category based on satisfactory payment behavior. The Bank also is required to create an allowance for consumer and mortgage loans that have been restructured and classified no lower than “D.” Such classification may be subsequently changed based on payment behavior, but cannot be classified lower than “B.”

Furthermore, the Bank applies the arrears method to past due loans for more than 90 days considering the total amount of principal past due when one installment payment has fallen into arrears.

The Bank suspends the accrual of interest on loans when past due for more than 90 days and 60 days for credit cards.

2.5 Determination of provisions to cover credit risks on loan losses in the loan portfolio, other assets and contingent operations

2.5.1 Allowance for loan losses

Determination of allowance for loan losses is based on local Banking Regulations for Asset Valuation, as approved by the Monetary Board in its First Resolution of December 29, 2004, as well as complementary regulations and observations made by the Superintendence of Banks. (Basis of determination of allowances).

According to these regulations, the estimate of loan loss reserves depends upon the type of loan: major commercial debtors, minor commercial debtors, consumer and mortgage loans. The estimation of loan loss reserves for major commercial debtors is based on a detailed quarterly review of each debtor’s solvency, payment history and country risk performed by the Bank for 100% of its major commercial debtors and subject to review by the Superintendence of Banks, using specific percentages based on debtor classification.

Minor comercial debtors’ classification is based only in payment history. The Superintendence of Banks of the Dominican Republic, through Circular Letters 001/11 dated July 25, 2011 and expiration date June 30, 2013, allows financial institutions when performing evaluations regarding minor debtors to take into consideration only the payment history. After the expiration of the aforementioned Instruction Letter, minor debtors will be classified quarterly considering the categorized analisis of each debtor based on solvency and as established in the Regulation for Asset Valuation and the evaluation of other factors such as: liquidity ratio, profitability ratio, leverage ratio, market analisis, payment performance history, country risk and alignment.

Furthermore, such regulation requires a provision for the effect of exchange fluctuations on foreign currency loans classified as D and E and considers 20% of the amount past due on collateralized loans for more than 90 days in arrears.

(Continues)

**BANCO DE RESERVAS DE LA REPÚBLICA DOMINICANA,
BANCO DE SERVICIOS MÚLTIPLES AND SUBSIDIARIES**

Notes to the Interim Consolidated Financial Statements

As of June 30, 2013 and December 31, 2012 and for the six month
Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

Through SB Circular: No. 002/11 dated July 25, 2011, the Superintendence of Banks granted a waiver for the positive difference in the exchange rate on foreign currency loans, classified in categories D and E, accordingly. As required in Circular letter No. 004/09 dated March 24th, 2009, a period of two (2) years was established beginning on the date of the aforementioned regulation to constitute provisions caused by positive differences in exchange rate.

Additionally, establishes that the amount of the allowance that the banks will present at the date of this Instruction Letter will be transferred to the account 129.01.M.08 “additional provision for risky assets” and can be used to cover requirements of provisions for risk on the different types of assets.

Also the Superintendence of Banks provided special approval to classify some credits that might be classified different if the they were evaluated in accordance with the banking Regulation for Assets Valuation.

Loan collateral, as a factor of security in the collection of loans, is considered a secondary element and is not taken into account when determining debtor classification, even though this is considered when determining the necessary reserves (in the case of commercial debtors). Small commercial debtors, consumer and mortgage loans are determined based on the day of arrears.

Collaterals that secures credit operations are classified based on its use and ease of conversion to cash, in accordance with the Banking Regulations for Asset Valuation. The type of collateral is considered as a secondary element in the calculation of the loan loss provision coverage, according to the acceptable amounts established. Acceptable collateral is quantified using specific discount percentages of its estimated conversion to cash value as established in the Regulations. Collaterals are classified as follows:

Multi-use collateral (“garantías polivalentes”)

Includes real estate that is not specific to any activity but has multiple uses, is easily transferable, is easy to convert to cash, easily appraised and easy to monetize without excessive costs and with a stable value. Such collateral is considered at 50% to 100% of its value for the purpose of estimating the risk coverage by such assets, depending on the type of collateral.

Specific use collateral (“garantías no polivalentes”)

Represents assets difficult to convert to cash or monetize. Generally these assets are user specific. Such collateral is taken into account at 30% to 50% of its value for the purpose of estimating the risk coverage provided by such assets.

Each classification of collateral is taken into account in calculating the amount of loan coverage based on schedule 8 (Tabla 8) the percentages established in the Banking Regulations for Asset Valuation (REA).

Notes to the Interim Consolidated Financial Statements

As of June 30, 2013 and December 31, 2012 and for the six month
Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

2.5.2 Allowance for loans portfolio of the public sector

Until November 2012 major commercial debtors of the public sector were evaluated only at a credit rating level considering that the documentation contains in the credit files, evidence of budgetary allocation, authorization of the Ministry of Finance on flows allocated in the Government Budget of the Dominican Republic and behavioral evidence corresponding to payment following the Instructional Guidelines for Investment Credit Evaluation and Contingent Operations of the Public Sector, and clarifications and circulars related.

In December 2012 the Superintendence of Banks of the Dominican Republic authorized the Bank to not constitute allowance for public sectors loans classified as risk A (see note 3).

2.5.3 Allowance for interest receivable

The allowance for losses on interest receivable is determined using specific percentages according to the classification of the corresponding principal. Provision for interest on consumers, mortgage and minor business loans is based upon specific percentages for each loan, depending on past-due payments using parameters established in the Banking Regulations for Asset Valuation (REA).

Interest past-due over 90 days (except for credit card balances) is fully reserved. Interest receivable on credit cards is fully reserved over 60 days past-due. Such accounts are then maintained on a non-accrual basis, are recorded as a memorandum account (“cuentas de orden”) and interest is recognized as income only when collected.

2.5.4 Allowance for other assets

Banking Regulations for Asset Valuation (REA) set forth a maximum term of three years, starting after the expiration of 120-day period after foreclosure, to create a provision for assets received in settlement of loans. Reserves should be established as follows if assets remain unsold:

Movable goods: 100% over two years, recorded on a straight-line basis starting on the seventh month.

Real estate: 100% over three years, recorded on a straight-line basis starting on the thirteenth month.

Existing reserves for loan losses relating to collateral that has been foreclosed must be transferred to “allowance for losses on assets received in loan settlements.”

Impairment in the value of assets received in settlement of loans, calculated as the difference between book and market values determined by independent appraisers, is charged as expense when determined.

(In thousands of Dominican Pesos)

2.5.5 Allowance for contingencies

The allowance for contingent obligations, included in “other liabilities”, relates to provisions for guarantees granted, endorsements, letters of credit and credit lines available for credit cards, among others. Such provision is determined along with the rest of the debtor’s obligations and is made depending on the risk classification of the debtor and on collateral acceptable for the calculation of the provision. The nature, amounts and estimation of contingent liabilities are described in note 28 of the interim consolidated financial statements-staturey basis.

2.6 Employee benefit cost

2.6.1 Bonuses and other benefits

The Bank accounts for employee benefits such as bonuses, Christmas bonus, vacation and other benefits according to the Labor Law in The Dominican Republic and its own incentive policies for employees.

2.6.2 Retirement and pension plan

The Bank (Parent Company only) has a defined benefit pension plan and other pension plan for employees that are not covered by Social Security Law No. 87-01 of May 9, 2001, which established the Social Security System of the Dominican Republic. As established by the by-laws of the Pension Plan approved by the Board of Directors of the Bank, the contribution of the Bank (Parent Company only) to the Plan is 5.40% of the monthly salaries paid to officers and employees, plus 2.5% of the gross profits of the Bank (Parent Company only) and extraordinary contributions. In December 31, 2010, the Superintendence of Banks allowed that the liability for the defined benefit pension plan be recognized prospectively on a eight (8) year period beginning in December 2011 using the straight line method.

Additionally, the Board of Director approved pensions to be paid directly by the Bank, which are included in the determination of actuarial liability of the Plan.

Also, the Bank makes contributions, in accordance with the requirements of the Social Security Law No. 87-01, dated May 9, 2001 which created the Social Security System of the Dominican Republic. This system operates under a format of individual capitalization accounts and is comprised of contributions to be made by the employer and employee and that must be managed by the Administradora de Fondos de Pensiones (AFP). The contributions made by the Bank are recognized as expenses as incurred. When the employee reaches retirement age, they will receive the balance of their account plus the financial return from the AFP.

(In thousands of Dominican Pesos)

2.6.3 Severance compensation

The Labor Code of the Dominican Republic sets forth the payment of indemnities (“auxilio de preaviso”) to employees whose contracts have been terminated without just cause. The Bank records these payments as expenses when paid.

2.7 Valuation of investments

2.7.1 Investments in debt securities

Investments are accounted for at cost less required allowance.

The Bank classifies the investments in four (4) categories: trading, held to maturity, available-for-sale and other investment in debt instruments.

Trading securities correspond to investments acquired with the purpose of obtaining profits derived from fluctuations in prices, and which are traded on a stock exchange market or other type of organized market. Held-to-maturity correspond to investments that the Bank has the positive intent and ability to hold until maturity, and are traded in an active organized market. Available-for-sale investments correspond to instruments that are traded in an active and organized market and that do not meet the criteria to be classified as trading or held to maturity. All securities that are not traded in active or organized markets and are not classified in the previous categories, are classified as other investments in debt securities.

Trading securities are recognized initially at cost. The changes in the market value are recognized in the consolidated statement of income-statutory basis as a gain or loss on fair value changes.

Available for sale investments are recognized initially at acquisition cost. The changes in the fair value are recognized in equity as an unrealized gain or loss on available for sale investments.

Held to maturity investments and other investments in debt instruments are recognized at amortized cost.

For instruments issued or guaranteed by the Dominican Government, the Superintendence of Banks authorized that they are considered risk-free with 0% allowance.

2.7.2 Investments in shares

Investments in shares are carried at cost, net of allowance for losses.

Allowance for investments in shares is determined using the same criteria as for major commercial debtors. (See note 2.5.1)

2.8 Valuation of property, furniture and equipment and the depreciation method used

2.8.1 Basis of recognition

Land and buildings are carried at market values as determined by independent appraisers as of December 31, 2004. Land and buildings acquired after that date and other furniture and equipment are carried at cost. Depreciation is calculated using a method similar to the declining balances depreciation method.

2.8.2 Depreciation

Depreciation percentages are the followings:

<u>Description</u>	<u>Estimated Useful Life in Years</u>
Buildings	5%
Furniture and equipment	15-25%
Lease improvements	<u>50%</u>

2.9 Assets received in loan settlements

Assets received in loan settlements are carried at the lower of:

- a) Value agreed upon payment in kind or the award price in a public auction.
- b) Market value at the date assets are received.
- c) Outstanding balance of the loan plus interest and/or accounts receivable, which are being cancelled.

The valuation reserve for these assets is determined following the criteria established by the Superintendence of Banks, as described in note 2.5.4.

2.10 Deferred charges

Deferred charges include prepaid income taxes, deferred income taxes and other prepaid expenses.

Other prepaid expenses are amortized as the prepaid services are received.

Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

2.11 Assets and liabilities in foreign currency

Amounts in the accompanying interim consolidated financial statements are presented in Dominican pesos (RD\$). Assets and liabilities in other currencies are translated using the exchange rate set by the Central Bank of the Dominican Republic at the date of the interim consolidated financial statements. Transactions during the year and income and expenses are translated at the exchange rate at the date of the transaction. Resulting gains or losses of the translation of assets and liabilities in foreign currency are recognized under other income (expense) in the accompanying consolidated income statements.

At June 30, 2013 and December 31, 2012, the purchase exchange rates established by the Central Bank of the Dominican Republic were RD\$41.7930 and RD\$40.2612, respectively, in comparison to United States of America Dollars.

2.12 Revenue recognition and most significant expenditures

2.12.1 Finance income and expenses

The Bank recognizes interest income on loans and investments under the accrual method. Loan interest is calculated using the simple interest method on outstanding capital amounts. Loan interest is no longer recognized and placed on nonaccrual status when a loan is past due for 90 days, except for credit card balances, which are placed on nonaccrual status after 60 days, the subsequent interest receivable is recorded in a memorandum account and recognized as income when collected.

Under the authorization of the Superintendence of Bank of the Dominican Republic, the Bank records as interest income, the commissions on discount of invoices when they are collected.

Interest from investments is recognized based on the outstanding balance of the investment. Premium and discounts from the acquisition of the investments are amortized over the life of the investment as part of the interest paid.

Interest income on investments are recognized in the accrual basis using the effective interest rate. Revenues from the rest of the services rendered by the Bank are accounted for when they are generated.

2.12.2 Revenue recognition of insurance companies

The most important insurance contracts issued by the Bank's insurance subsidiary are as follows:

(a) Short-term insurance contracts - These are annual, semi-annual or quarterly contracts with renewable options issued by the company and covering personal risks and recorded as income when invoiced.

As of June 30, 2013 and December 31, 2012 and for the six month
Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

(b) General insurance contracts - Premiums on these contracts are earned at the time of their underwriting which coincides with the commencement of the term of the contract. Premiums that have been underwritten before the commencement of the term of the contract are unearned and are not recognized in the consolidated financial statements.

In connection with the terms and conditions agreed with the reinsurers, premiums ceded in reinsurance are recognized at the time of recording the premium income.

Cancelled premiums are recognized as a deduction of the income for premiums issued.

2.12.3 Revenues from the Fund Pension Administrator (AFP)

The Administrator of Pension Funds (AFP) receives a management fee and a complementary commission from its affiliates and employer, as well as a fee for optional services offered.

Income from the management fees results from the management of personal accounts on behalf of the affiliates to the Pension Fund T-1 (Contribution) and T-4 (Distribution) , and is recognized upon receipt of the resources corresponding to the contributions of the affiliates based on 0.5% of the monthly quotable salary.

The income from the complementary annual commission of the Pension Fund T-I (Contribution), T-4 (Distribution) and T-5 (Social Solidarity) equals to 30% of the excess of yield portfolio of the weighted average rate of the previous month for all terms of time deposits, indefinite certificates of deposit and financial certificates issued by commercial and multiple services banks. The rate is reported to the AFP by the Superintendence of Pensions according to the information provided by the Central Bank of the Dominican Republic.

Monthly charges from complementary annual commissions are made on the basis of 50% of the previous month, with the exception of the first month of the year in which is charged 100% of the previous month's balance, following the guidelines of Resolution No. 34 -03, No. 232-05 and No. 239-05.

2.12.4 Revenues for services to the Health Insurance Administrator (ARS)

The Health Insurance Administrator (ARS) recognizes revenues for services under the accrual method. Health Services Plan are recognized and billed when UNIPAGO (entity in charge of processing the Database of the Dominican Social Security System) sends the affiliation report to the ARS. Complementary plans and voluntary plans are recognized when the coverage becomes effective.

Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

2.12.5 Revenues from real estate

Revenues from sale of apartments, houses and land properties are recognized when all the risks and rewards of ownership or property has been transferred, which regularly occurs upon closure of sales contracts and thus receiving a substantial part of the price agreed upon.

Income fees from the sale of properties, interest on investments and other income are accounted for when earned.

Income from leasing of real estate and equipment rental is accounted for under the accrual basis of accounting, (i.e., when the service has been rendered).

2.12.6 Toll revenue

Revenue from management of toll stations is recognized under the accrual basis of accounting, (i.e., when the services have been offered to the customers).

2.12.7 Revenues from Reservas Asistencia

Revenue from the rendering of services for road, home and personal assistance are recognized using the accrual basis of accounting, that is, when services have been rendered to the customers.

2.13 Provisions

The Bank establishes reserves whenever it considers that it has incurred an obligation as a result of a past event, when it is probable that it will have to disburse financial resources to settle these obligations and when a reasonable estimate of the amount involved can be made.

2.14 Income tax

According to the Banks's Organic Law, the Bank is exempted from income tax payment. However, the Bank calculates and voluntarily pays income tax following the guidelines of the Tax Code and specific criteria, considering that the beneficiary is also the Dominican Government. In this regard, the Bank recognizes the tax effects of transactions in the year in which they are included in profit or loss, regardless of when they are recognized for tax purposes, including provisions for risky assets and special contributions of the Bank's employees Pension Plan, among others.

Pursuant to paragraph "A" of Article 24 of Law No. 8-90 regarding the establishment of new free zones and the growth of existing ones, Operadora de Zonas Francas Villa Esperanza S. A. is also exempt from payment of income tax, in force until 2017. The remaining subsidiaries of the Bank are subject to payment of income tax, for which, the tax effects of the transactions are recognized in the year in which they are included in profit or loss, regardless of when they are recognized for tax purposes.

Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

Total expense caused by income tax is recognized in the interim consolidated statement of income-statutory basis.

2.15 Financial instruments

A financial instrument is defined as cash, evidence of a property right or interest in an entity, or a contract that creates an obligation or a right to pay or receive cash or another financial instrument from a second entity in terms potentially favorable to the first entity. It is also established that for deposits with an indefinite term, such as checking and savings accounts, the market value is the amount payable to presentation.

For those financial instruments without available quoted prices, market value is estimated using present value techniques or other valuation methods. These techniques are subjective and significantly affected by the assumptions used, such as discount rates, estimated cash flows and estimated prepayments. To this effect, resulting estimated values cannot be verified by comparison to independent markets and, in many cases, such securities cannot be realized immediately.

The estimated market values of the financial instruments of the Bank, their book value and the methodology used to estimate them are described below:

Short-term financial instruments

Short-term financial instruments, both assets and liabilities, are carried at the cost recorded in the Group's consolidated balance sheet. This cost is similar to market value because of the relatively short-term period between the origination of the instruments and their subsequent realization. This category includes: available funds, acceptances receivable and outstanding, interest receivable and interest payable.

Investments in securities

The fair values of investments in securities and equity are estimated based on cost adjusted for impairment and are determined following specific guidance issued by the Superintendence of Banks, as there is no active securities market in the Dominican Republic that can provide market values.

It is not possible to estimate a market value for certificates of deposits outstanding as there is no active market for these instruments in the Dominican Republic.

As of June 30, 2013 and December 31, 2012 and for the six month
Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

Loan portfolio

The loan portfolio is carried out at book value, adjusted for loan loss allowance as established by the regulatory authorities. Loans are segregated by type such as commercial, residential mortgage, consumer and credit cards.

Interest on financial assets and liabilities

Interest earned on financial assets is recognized under the accrual method using the simple interest method, based on outstanding amounts of principal. Interest expense on financial liabilities is recognized using the same method.

2.16 Derecognition of financial assets

Financial assets are derecognized when the Bank loses control and all contractual rights of those assets. This occurs when the rights are converted to cash, when they expire, or are transferred.

2.17 Impairment of assets

The Bank reviews all long lived assets to determine if the events or changes in circumstances indicate that the carrying value of these assets will be recovered from operations.

Recoverability of an asset maintained and used in operations is measured by comparing the carrying amount of the asset with the discounted cash flow generated by that asset. If, after making such comparison, it is determined that asset values have been negatively affected, the amount to be accounted for as a loss impairment will be the excess of the carrying amount over the fair value of the asset and this loss is recorded affecting the net income of the year when determined.

2.18 Contingencies

The Bank defines contingencies, as the credit risks assumed in certain operations that might become direct future credits, and generate obligations to third parties, depending on possible future events.

2.19 Accounts receivable

Accounts receivable are recorded at amortized cost net of any impairment loss.

The allowance for doubtful accounts is recognized through a charge to expense when the Group's management determines that collectability is doubtful based on payment history, the economy and other factors that affect the industry and the specific client.

Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

2.20 Mathematical and technical life insurance reserves

Mathematical and technical life insurance reserves are calculated on the basis of net premiums and consider mortality tables and interest used by the Bank.

Mathematical reserves for life insurance consist of the amount equivalent to the difference between the present value of the Bank's obligations towards the insured and the present value of the insured obligations towards the Bank, which is determined based on actuarial calculations.

Resolutions 293-09 and 294-09, changed the basis for calculating these provisions, considering the indexed salary which should be determined in accordance to the changes in the consumer price index reported by the Central Bank of the Dominican Republic. When the application of this basis results in a lower amount, the original basis of calculation should be maintained. Reserves for outstanding casualty claims regarding to disability and survivorship should amount to a 45% of the estimated actuarial reserve.

As established in Article 141 of Law No. 146-02 on Insurance, technical reserves for collective life, personal accident and health insurance are calculated on the basis of the following specific percentages:

Collective life, personal accidents and health insurances, provided premium are collected on a monthly basis	5%
Personal accidents when the premium is collected at terms	40%
Survivorship and disability	<u>5%</u>

2.21 Reserve for unearned insurance premiums

As established by Law No. 146-02 of the Superintendence of Insurance, unearned premium reserves, commissions on unearned premiums and commissions earned on assigned reinsurance premium are determined based on fixed percentages, as follows:

Transportation and freight	15%
Bank guarantees	40%
For other insurances	<u>40%</u>

2.21.1 Specific reserve

Claims for insurance contracts that are pending for settlement or payment at the date of the financial statements, are recorded as specific reserves.

Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

2.21.2 Amortization of non-proportional contracts - catastrophic premiums

Non-proportional (catastrophic) contracts have a term from July 1 to June 30 of the following year. Premium paid on these contracts is amortized on a straight line basis.

2.21.3 Incurred But Not Reported claim reserves (IBNR)

This reserve represents the amount of claims that have occurred at the date of the financial statements, but have not been reported to the health insurance administrators. Resolution No. 163-2009 of the Superintendence of Health and Labor Risks, states that the Bank should calculate the IBNR reserve based on 10% of claims incurred during the current period less the claims incurred from last year.

2.22 Segment reporting

A business segment is a group of assets and operations that are responsible for providing products or services which are subject to risks and returns that are different from those of other business segments. Geographic segments provide products or services within a particular economy environment that is subject to risk and rewards that are different to other segments in other economy environment.

2.23 Distribution of dividends

The Bank distributes profits to shareholders for an amount lower than the accrued benefits minus interest and commissions receivable on loans and investments net of any reserves. The distribution of dividends to the Dominican Republic State is exempt from income tax payment.

3 Change in accounting policy

On December 14th, 2012, through Letter 0981, the Superintendence of Banks of the Dominican Republic authorized the Bank to value the public sector loan portfolio using the same methodology used for the valuation of investments in securities issued or guaranteed by the Dominican Government with an allowance requirement of 0%, thus established that public sector loans that are classified in risk category A do not require any allowance.

4 Transactions in foreign currency and exchange exposure

The following is a detail of the Bank's balance in foreign currency as of June 30, 2013 and December 31, 2012:

	June 30, 2013		December 31, 2012

- (i) Represents loans that are current in principal payments.
- (ii) Represents principal and interest receivable of loans, that being current or past due, their payment terms and conditions have been changed, resulting in a variation of the interest rate and/or maturity of the original loan contract, as well as credits originated in interest capitalization, past due commissions and other charges of the original loan.
- (iii) Corresponds to principal installments and interest receivable that represent arrears of 31 to 90 days with respect to the date that principal payment should have been made.
- (iv) Corresponds to total principal and interest receivable that are past due in its principal payments for more than 90 days. For loans that are paid in installments, the total loan amounts are classified as past due loans when the installments are more than 90 days past due. It also includes overdrafts on demand deposits accounts with more than three (3) days unpaid balances.
- (v) Corresponds to principal and interest receivable of loans that are in legal collection process.

c) *By category of collateral:*

**BANCO DE RESERVAS DE LA REPÚBLICA DOMINICANA,
BANCO DE SERVICIOS MÚLTIPLES AND SUBSIDIARIES**

Notes to the Interim Consolidated Financial Statements

As of June 30, 2013 and December 31, 2012 and for the six month
Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

As of June 30, 2013 and December 31, 2012 loans to private sector include RD\$550,000 thousand, equivalent to credit line operations with contractors who are working with the Dominican Government. These credits are guaranteed by the Dominican Republic Government, and the Superintendence of Banks authorized the risk "A" classification with a provision of 1%.

Interest receivable include RD\$127.5 thousand and RD\$109.9 thousand at June 30, 2013 and December 31, 2012, of loans granted to Credit Cards holders.

At June 30, 2013 and December 31, 2012, a significant amount of the loan portfolio of the Bank corresponds to loans granted to public sector entities. In December 2012, these loans were authorized by the Superintendence of Banks to be classified with 0% of provision requirement if the borrower is in the "A" risk category.

9 Customer acceptances

A summary of customer acceptances as of June 30, 2013 and December 31, 2012 is as follows:

<u>Correspondent Bank</u>	<u>June 30, 2013</u>		<u>December 31, 2012</u>	
	<u>Amount RD\$</u>	<u>Maturity</u>	<u>Amount RD\$</u>	<u>Maturity</u>
Wells Fargo Bank, represents US\$83, in 2012	-	-	3,330	2013
Deutsche Bank/Standard Chartered, Bank, represents US\$90 in 2013 And US\$30 in 2012	3,761	2013	1,200	2013
Bank of America, corresponds to US\$4,695	-	-	189,044	2013
	<u>3,761</u>		<u>193,574</u>	

10 Accounts receivable

As of June 30, 2013 and December 31, 2012 accounts receivable comprise:

	<u>June 30, 2013</u>	<u>December 31, 2012</u>
Commissions receivable	2,074	8,371
Other receivables:		
Accounts receivable from employees	20,889	17,858

24 Income tax

The Bank and its subsidiaries calculate and pay income tax individually. The consolidated entities calculate income tax based on its accounting practices to comply with current legal requirements.

Income tax expense for the six month periods ended as of June 30, 2013 and 2012 is compose of the following:

	<u>2013</u>	<u>2012</u>
Income tax expense	<u>420,468</u>	<u>159,937</u>
	<u>420,468</u>	<u>159,937</u>

Law No.253-12 (concerning the strengthening of the collection ability and revenue capacity of the country for the fiscal and development sustainability), introduced significant changes to the Dominican tax law with reference to income tax expense, taxes on equity, Value Added Services (VAT) and selected tax on purchases, other measurements were adopted and requirements of General Rule 04-2011 concerning Transfer Pricing were expanded. Some of the main changes are the following:

- (a) Extension of corporate income tax rate of 29% until 2013 and future reductions to 28% in 2014 and 27% beginning in 2015.
- (b) Increase of VAT rate from 16% to 18% and the adoption of a reduced tax (8%) but progressive for certain products.
- (c) Article 308 of the Dominican Tax Code established through Law 11-92 was modified to require entities that pay or credit dividends; or conduct any form of retained earnings distribution to individuals or entities, residents or non-residents of the Dominican Republic, to withhold and pay to the tax authorities a 10% tax on dividends paid.
- d) As of June 30, 2013 and December 31, 2012, the credit balance is included in the line deferred charges in the account “other assets” of the unconsolidated balance sheets.

On February 8, 2013, the local financial entities, represented by the Dominican Republic’s Commercial Banks Association, -known as Asociación de Bancos de la República Dominicana, Inc., ABA-, signed an agreement with the Ministry of Finance and the Directorate of Internal

(In thousands of Dominican Pesos)

- 50% - For amortization of no less than 5% of Certified bonds issued by the National Treasurer on behalf of the Dominican Republic Government, plus interest. The resulting surplus will cover the debt of the Dominican Government and its dependencies as approved by the Board of Directors, upon previous notice to the Executive Power.
- 35% - To Transfer to the reserve account.
- 15% - To cover debts of the Dominican Republic Government and its agencies with the Bank.

As per to the First Resolution of the Ordinary Session of January 12, 2012, the Board of Directors approved dividends in the amount of RD\$2,481,180 during 2011 as follows:

- i) RD\$868,413 transferred to equity reserve.
- ii) RD\$75,000 to redeem the National Treasury vouchers.
- iii) RD\$6,000 to offset interest on Treasury vouchers.
- iv) RD\$372,177 to offset the Dominican State debts, of which RD\$184,415 have been used as of December 31, 2011.
- v) RD\$1,159,590 to be paid to the Dominican Republic Government in cash.

Additionally, According to the First Resolution of the Ordinary Session of January 10, 2013, the Board of Directors approved dividends in the amount of RD\$2,221,574 during 2012 as follows:

- i) RD\$777,551 transferred to equity reserve.
- ii) RD\$75,000 to redeem the National Treasury vouchers.
- iii) RD\$5,250 to offset interest on Treasury vouchers.
- iv) RD\$333,236 to offset the Dominican State debts.
- v) RD\$1,030,537 to be paid to the Dominican Republic Government in cash.

Also, according to the first Ordinary Resolution dated January 10th, 2013, the Board of Directors met and approved that retained earnings available for distribution to be granted in cash to the Dominican Republic Government and the corresponding 15% to pay off debts, -as well as retained earnings for those concepts corresponding to year 2010 and 2011, be distributed as dividends to the Dominican State or capitalized at request of the Ministry of Finance and that previous to the delivery or capitalization, an acknowledgement of receipt must be presented to the Board of Directors for their knowledge and approval.

The Board of Directors, by its Twentieth Resolution, of the Ordinary Session of June 13, 2013, reviewed and approved the transfer to the Dominican State of a total of DOP\$3,178,033 that was pending to transfer from the retained earnings of the profits of the fiscal years 2010, 2011 and 2012.

Other equity reserves

In accordance with the Bank's organic law, the Bank must segregates 35% of its yearly net profit to equity reserves. As of December 31, 2012 the Bank segregated the equity reserve in the amount of RD\$777,551.

Through Circular Letter SB/0682 dated December 31, 2010 the Superintendence of Banks issued a no objection to the application within the fiscal year of the segregation of 35% of net income as other equity reserves, provided that they are restricted to the guidelines for distribution of profit set by the supervisory body.

Revaluation Surplus

The Bank revalued its land and buildings to their estimated market value determined by independent appraisers in the year 2004, as allowed by the Prudential Rules of Capital Adequacy. The value of the revaluation was RD\$915,737 and its presented net of the accumulated depreciation in the consolidated balance sheet. The Bank classified this amount as secondary capital, with the authorization of the Superintendence of Banks of the Dominican Republic.

BANCO DE SERVICIOS MÚLTIPLES AND SUBSIDIARIES**

Notes to the Interim Consolidated Financial Statements

As of June 30, 2013 and December 31, 2012 and for the six month
Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

According to the practices of the insurance company, most risks retained are reinsured under catastrophic coverage and excess loss and consequently, it is estimated that additional losses that the Bank might incur would not be significant.

(a) Leasing of offices, buildings and cash teller machines (ATM)

The Bank has subscribed lease contracts of buildings where some of its administrative offices, service offices, business centers and ATM's are located. For the six month periods ended as of June 30, 2013 and 2012, expenses for this concept amounted to RD\$130,715 and RD\$108,838, respectively, which are registered in other operating expenses in the accompanying consolidated income statements - statutory basis.

(b) Superintendence of Banks Fees

The Monetary Board of the Dominican Republic, requires the financial entities to make a contribution in order to cover the inspection services that are conducted by the Superintendence of Banks of the Dominican Republic. The expense for this concept for the six month periods ended as of June 30 2013 and 2012, was of approximately RD\$207,505 and RD\$187,756, respectively, and it is registered in other operating expenses in the accompanying consolidated income statements - statutory basis.

(c) Contingency Fund

Article 64 of the Monetary and Financial Law No. 183-02 dated November 21, 2002 and the Regulation for the Operation of the Contingency Fund, assumed through the First Resolution issued by the Monetary Board on November 6, 2003, authorizes the Central Bank of the Dominican Republic to collect quarterly contributions from the entities of financial intermediation for this Fund.

The contribution shall be 0.25% quarterly of total assets minus the quarterly supervision quota charged by the Superintendence of Banks of the Dominican Republic. This contribution shall not exceed 1% of total deposits from the public.

Expenses for this concept for the six month periods ended as of June 30, 2013 and 2012, was of approximately RD\$101,168 and RD\$111,055, respectively, and it is registered in the line item other operating expenses in the accompanying consolidated income statements - statutory basis.

(d) Fund of Banking Consolidation

For the implementation of the Exceptional Program for Risk Prevention of the Entities of Financial Intermediation according to Law 92-04, the Central Bank of the Dominican Republic created the Fund of Banking Consolidation (FBC) with the main purpose of protecting the depositors and avoiding systemic risk. The FBC was created with mandatory contributions

Notes to the Interim Consolidated Financial Statements

As of June 30, 2013 and December 31, 2012 and for the six month
Periods ended as of June 30, 2013 and 2012

(In thousands of Dominican Pesos)

from the financial entities and other sources as established by the above mentioned law. Such contributions are calculated considering customer deposits with a minimum annual rate of 0.17% to be paid quarterly.

Expenses for this concept for the six month periods ended as of June 30, 2013 and 2012, was of approximately RD\$167,263 and RD\$170,707, respectively and it is registered in the line item other operating expenses in the accompanying income statements - statutory basis.

(e) Credit Cards Licenses

MasterCard Credit Card

The Bank maintains a contract for the nonexclusive use of the MasterCard brand for charge card services, credit or debit card. The Bank does not pay fees for the rights of use of MasterCard. The Bank has the commitment to open a line of credit for no less than US\$5 for each Master Card Gold issued. The license is perpetual; subject to the termination provisions set forth-in the contract.

Visa Credit Card

The Bank has a contract with a foreign company for the nonexclusive use of Visa and Electron charge card services, credit or debit card. The Bank does not pay fees for the rights of use of Visa. The duration of the license is perpetual, subject to termination as stated in the contract.

(f) Lawsuits

As of June 30, 2013 and December 31, 2012, there are several lawsuits and demands originated in the normal course of the Banks operations. The Bank considers jointly with its legal advisors that the resolution of these claims will not result in an adverse material effect. As of June 30, 2013 and December 31, 2012, the amount reserved to face these demands is of RD\$107,887 and RD\$105,394, respectively, and it is registered in other liabilities in the accompanying consolidated balance sheets - statutory basis.

(g) Taxes on Financial Assets

Article 12 of Law No. 139-11 dated June 22, 2011, established for a period of two (2) years after the promulgation of the Law, an annual tax of 1% on the average productive financial assets net of some exempt amounts. It also exempts the financial institutions from the obligation of liquidating and paying the tax to the total assets as established by Law 557-05. Article 40 of Law 253-12 dated November 9, 2012, extended until December 31, 2013 the current period of the Tax on the Net Productive Financial Assets. At June 30, 2013 and 2012, recorded expenses for this concept for the amounts of approximately RD\$768,724 and RD\$567,903, respectively, which is included in the line item of other operational expenses in the accompanying consolidated income statements - statutory basis.

15 days adjusted	142.77%	134.28%	90.03%	186.44%
30 days adjusted	143.83%	126.01%	171.90%	253.08%
60 days adjusted	117.28%	106.88%	157.55%	172.29%
90 days adjusted	<u>101.40%</u>	<u>106.83%</u>	<u>134.69%</u>	<u>166.13%</u>
Position:				
15 days adjusted	7,658,678	125,715	(1,243,413)	199,630
30 days adjusted	9,070,551	109,457	12,028,679	391,003
60 days adjusted	5,472,846	36,516	13,816,611	275,524
90 days adjusted	569,602	37,573	10,813,767	263,768
Overall (months)	<u>(2.87)</u>	<u>(58.28)</u>	<u>(9.41)</u>	<u>(21.13)</u>

The regulations on liquidity risk establish that the maturities of liabilities for the period of 30 days should be covered by assets maturing in at least 80% of that amount for both currencies. At June 30, 2013 and December 31, 2012, the Bank (Parent Company) had a coverage of 143.83% and 171.90% in local currency, respectively, and 126.01% and 253.08% in foreign currency, respectively, exceeding the minimum required. For a period of 90 days it is required 70% of maturity of the adjusted liabilities. At June 30, 2013 and December 31, 2012, this ratio showed 101.40% and 134.69% in local currency, respectively, and 106.83% and 166.13% in foreign currency, respectively. The consolidated global position of assets and liabilities in local and foreign currency at June 30, 2013 and December 31, 2012, mature in 2.87 and 9.41 and 58.28 and 21.13, months, respectively, before the liabilities.

39 Pension fund

The Bank (parent company) makes contributions to the following pension plans:

- a) A pension plan with defined benefits and other pension plan for the employees that are not covered by Social Security Law No. 87-01 dated May 9, 2001, established by the Social Security System of the Dominican Republic. According to the regulations of the Pension Plan, approved by the Bank's Board of Directors, the contributions of the Bank to this plan amounts to 5.40% of the monthly salaries paid to officers and employees, plus 2.5% of the Bank's gross profits. Additionally, the Bank may make extraordinary contributions based on the results of actuarial studies. A summary of the financial information on the plan (unaudited) is as follows:

	<u>2013</u>	<u>2012</u>
Present value of obligation for past service	(11,688,221)	(11,688,221)
Net assets of the plan	<u>6,231,428</u>	<u>5,463,018</u>
Net position of the fund	<u>(5,456,793)</u>	<u>(6,225,203)</u>

The expenses recognized during the six months periods ended as of June 30, 2013 and 2012 amounted to RD\$415,607 and RD\$336,422, respectively. These expenses include extraordinary contributions amounting to RD\$121,150 in both years..

The Superintendence of Banks through Circular Letter SB ADM/0681/10 of December 31, 2010, did not object that the Bank recognizes from 2011, an extraordinary annual payment of RD\$242,300 for a period of nine years, to cover the actuarial deficit determined in accordance to the actuarial study carried out in 2007. For such effect, the Bank was required to submit to the SIB the Minutes of the Board of Directors that approved the transaction, a study with its recommendations concerning the financial position and viability over the next nine years and the balance of the actuarial deficit included in the plan dated December 31, 2010. This information was provided through letter ADM-1384-11 of March 14, 2011.

- b) The Dominican Social Security System, created by Law No. 87-01 enacted on May 9, 2001, consist of a Contributive Regime that covers public and private employees. According to the Social Security System of the Dominican Republic all employees and employers must be affiliated to the Administradoras de Fondos de Pensiones (AFP) and Administradora de Riesgos de Salud (ARS). The officers and employees of the Bank are affiliated to several AFPs, being mainly affiliated to the Administradora de Fondos de Pensiones Reservas, S. A.
